

PROKURE V IS APPROVED FOR USE AGAINST CORONAVIRUS

ProKure V (EPA Reg# 87508-3-89334) is listed by the EPA to use against SARS-CoV-2, the virus responsible for COVID-19, when used on hard, non-porous surfaces in accordance to the Coronavirus directions on the label.

This liquid spray leaves behind no harmful residue and can be sprayed, mopped or sponged on all hard, non-porous surfaces. Applications include hospitals, clinics, commercial buildings, colleges, gyms, day care center, public places, transportation and other commercial and residential facilities.

- **Kills bacteria, mold, and viruses*, including human Coronavirus**
- **Easy to use**
- **Agitate and allow one hour before use to ensure solution reaches full strength**

There's currently no tougher job than protecting the public against the spread of Coronavirus, and Jon-Don is here to help you tackle that tough job with ProKure V.

* ProKure V (ProKure1 Liquid) Disinfectant / Fungicide / Deodorizer, EPA Reg. No. 87508-3-89334.

See EPA labels for full directions for specific uses and precautionary statements.
